

The Dayliff DE range of end suction centrifugal pumps are rugged heavy-duty pumps designed for various water supply, irrigation and fire fighting duties in agricultural, commercial and industrial applications. A wide range is available and pumps can be modified for specific duties by trimming the impeller diameter which must be done with reference to the particular pump curve. Motors should be selected according to the pump speed and impeller diameter and mounted together with the pumps on a base frame with coupling. The pumps are also suitable for belt drive by either electric motor or a diesel engine.

Features

- Heavy duty cast iron casing, bronze closed impeller and stainless steel shaft.
- Gland packing seal arrangement for ease of maintenance
- Back pullout design enabling removal of the rotating element without disturbing the pipework connections.
- Provided with connecting flanges and bolts.

Operating Conditions

Max Operating Pressure: 16Bar

Temp Range: -10°C to +105°C
