Dayliff Dirrijet range of impact sprinklers are efficient and robust products designed to meet varied irrigation requirements in agricultural and landscape applications. They are available in sizes from 1/2" to 2" in two ranges, Dirrijet A up to 1" for lighter duties and Dirrijet B 1 1/4" and 1 1/2" high output rain guns. A 2" adaptor is available to convert 1 1/2" to 2" inlet.

Dirrijet A are simple 360° double nozzle sprinklers that feature a friction collar and trip lock. Four models are available made from engineering plastic in sizes 10, 15 and 20 and brass in size 10B.

Dirrijet B are high specifications PVC rain guns, suitable for adjustable radius of operation up to full circle 360° and provided with an adjustable jet-breaker for uniform water distribution. Both sizes are of twin nozzles configuration featuring a standard 7mm nozzle and interchangeable nozzle diameters for different applications with five nozzles being provided as standard.

Model	Size	Nozzle	Pressure (bar)	Flow (m ³ /hr)	Jet Radius (m)	Irrigated Area (m ²)	Rainfall mm/hr
Dirrijet A-10	1/2"	-	2-4	0.5-1	10-13	350-590	2
