

The Dayliff DWC range of heavy duty submersible pumps are designed to handle industrial and domestic waste water and sewage with a specially designed cutter impeller. They are suitable for pumping water containing a high proportion of solid particles including threads and fibres.

Features

- Heavy duty construction including cast iron semi-open impeller with Tungsten Carbide cutting edge and cast iron pump casing.
- Provided with double mechanical seals and NBR oil seal.
- Designed for free standing installation and supplied with 10m power cable.
- Enclosure Class: IPX8
- Insulation Class: B
- Voltage: 1x240V

Operating Conditions

Pumped liquids: Thin, chemically non-aggressive liquids, containing suspended particles up to the specified size.

Max. Liquid temperature: +40°C

Max. Operating Depth: 10m

Min. Immersion Depth: 310mm

Model	kW	HP	Voltage (V)	Current (A)	Max Particle Size (mm)	DN (")	Dimensions (mm)							Weight (kgs)
