

DAVEY

DATA SHEET

**Self Priming
Waste Water Pump**

DYNAPRIME

PUMP

The Davey Dynaprime X201 is a self-priming open impeller pump designed for water transfer, drainage, sump emptying and effluent disposal applications. The open impeller design enables the pump to handle dirty water containing some impurities and foreign matter without clogging. Another feature of the design is a built-in check valve which prevents water drainage from the suction pipe when the pump is switched off. This virtually eliminates the necessity for re-priming.

The pump body, outlet, volute and backplate are made from non corrosive glass-filled Noryl, the impeller from high strength glass-filled nylon

MOTOR

The pump includes an integral Davey TEFC PSC type motor specified to match the hydraulic load. The motor is provided with an in-built thermal overload for hot running protection and can be connected directly to a power outlet. Fuse or MCB protection must be provided.

Enclosure Class: IP45

Insulation Class: F

Speed: 2900rpm

Voltage: 1x240V

Input Power: 0.8kW

Operating Current: 4.6Amps

OPERATING CONDITIONS

Pumped liquid: Thin, clean, chemically non-aggressive liquids containing some impurities and foreign matter up to 6mm diameter.

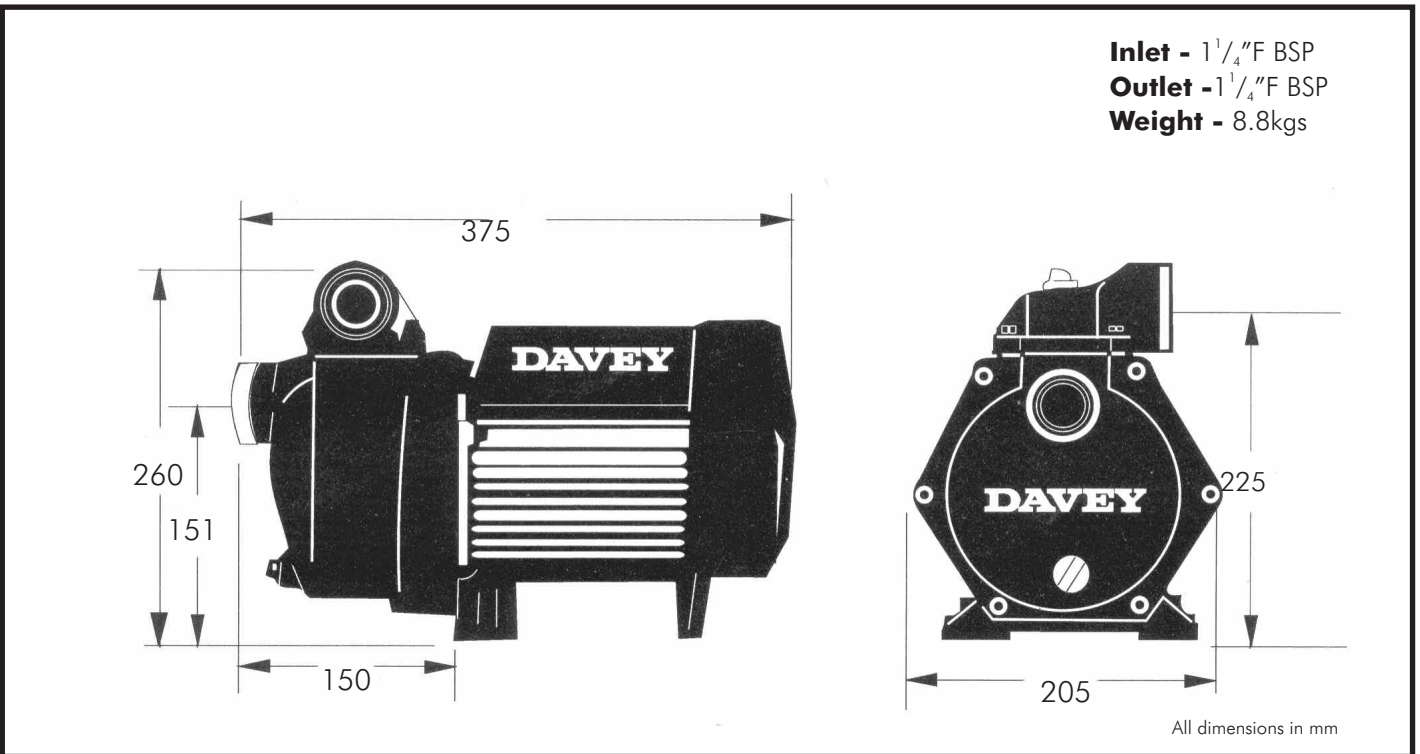

Max. Liquid Temperature: +50°C

Max. Ambient Temperature: +55°C

Max. Self Priming Depth: 5m (at sea level)

Max. Pump Inlet Pressure: 30m
